

# Telling a Random Story

ArrayList Advantages and Issues

# Arrays and ArrayList

- **String[] a** and **ArrayList<String> b**
  - a[k] compared b.get() and b.set()
- **int[] ac** and **ArrayList<Integer> bc**
  - Concerns with int/Integer conversions
  - ac[index]++ works
  - bc.get(index)++ DOES NOT WORK
- But, arrays don't grow, that's a concern!
